

171
SELECTED PUBLICATIONS FROM THE
AMERICAN SOCIETY FOR INFORMATION SCIENCE
1140 Connecticut Avenue, N.W., Washington, D.C. 20036

1. KEY PAPERS IN INFORMATION SCIENCE

Every paper an acknowledged classic

edited by Arthur W. Elias

A collection of 19 authoritative information-science related papers, reprinted in full text as originally published, designed for use in connection with the teaching of basic information science in colleges and universities. Topic areas: background and philosophy, information needs and information systems, organization and dissemination of information, and other areas of interest (copyright, equipment, machine translation, and systems analysis). Published 1971.

Students & ASIS members: \$5.50

Non-ASIS members: \$6.50

2. PROCEEDINGS OF THE ASIS WORKSHOP ON COMPUTER COMPOSITION

Papers and panel discussions at a two-day workshop sponsored by the Potomac Valley Chapter of ASIS, 8-9 December 1970, in Washington, D.C.

edited by Robert M. Landau

The Workshop had 45 invited participants drawn from a variety of fields involved in computer-controlled typesetting and photographic composition. The *Proceedings* cover the four topic areas presented: user needs, hardware, software, and systems, and costs and economics. Published 1971.

Non-ASIS members: hard-cover edition: \$8.50

ASIS members: hard-cover edition: \$5.50*

ASIS members: soft-cover edition: \$4.50*

For this
members

publication only, ASIS member prices also apply to
of IIA, ALA, PIA, and AFIPS constituent societies)

4. DIRECTORY OF EDUCATIONAL PROGRAMS IN INFORMATION SCIENCE; 1971/1972 EDITION

The first edition of a new reference tool that will be useful to students, potential students, and teachers of information science, and to high school and college guidance counselors.

edited by Lorna C. Wilkie

A directory of educational institutions that provide graduate-level courses or curricula in information science, including a listing of courses for 1971/72 academic year and an index of faculty members. Due November 1971.

ASIS members: \$4.50

Non-ASIS members: \$5.00

5. THE MARKETING OF INFORMATION ANALYSIS CENTER PRODUCTS AND SERVICES

Published by the ERIC Clearinghouse on Library and Information Sciences in cooperation with the ASIS Special Interest Group on Information Analysis Centers

Walter H. Veazie, Jr. and Thomas F. Connolly

A basic summary that presents the factors which will enable information analysis center sponsors and managers to determine what products and services should be considered as saleable and what could be charged for them. Published 1971.

\$2.00

6. TUTORIALS FROM THE 1967 ANNUAL MEETING OF ASIS, NEW YORK CITY

Each tutorial includes a student manual and an instructor manual. Each tutorial costs \$2.00; the entire set of the three tutorials costs \$5.00.

Tutorial I: Elements of Information Systems

Planning, Implementing, Designing, Operating

Principal Tutor: Paul St. Pierre

An introductory course in the techniques and terminology of

3. LIBRARY AND REFERENCE FACILITIES IN THE AREA OF THE DISTRICT OF COLUMBIA

8th edition

edited by Mildred Benton

A guide to 426 libraries in the Washington, D.C. area, identifying subject holdings, names, addresses, telephone numbers, hours of service, interlibrary loan regulations, and reference resources for each library. The revised edition represents the first publication of the Joint Venture, a non-profit cooperative endeavor of the ASIS, the Biological Sciences Communication Project of the George Washington University, the District of Columbia Library Association, the D.C. Chapter of Special Libraries Association, and the Federal Library Committee. Published 1971.

\$5.95

Tutorial II: Electronic Data Processing Concepts

Systems, I/O Equipment, Telecommunications

Principal Tutor: Bruce Stewart

Emphasis on a functional description of various types of equipment and how they work.

Tutorial III: Generalized Programming Languages and Systems

A review of program languages with reference to information storage and retrieval

Principal Tutor: Thomas Burgess

Stress on the relative merits of different program languages for use in textual analysis, file structure, file manipulation, and similar topics are stressed.
